## intelligence everywhere™

Motorola WPS870G
Wireless Print Server

Getting Started

1 **Confirm** that your box contains these items.

Before you begin, we recommend:
- Installing the printer drivers for the printers you intend to use, if not already installed.
- Collecting the Network Name (SSID) and wireless security settings (like WEP or WPA) for your wireless network.
- If you are running Windows XP, you may need to disable your built-in firewall for the installation process, see User Guide (Troubleshooting) for instructions.

Ethernet Cable

Power Supply

CD-ROM

WPS870G

2 **Connect** your Print Server as shown.
(See Section 2 of the User Guide for more information)

First: Connect the Ethernet cable to the router and then to the Print Server.

Second: Connect the power cable to an outlet and then to the Print Server.

WR850G or Wireless Router

OR

3 **Insert** the Installation Wizard CD-ROM. Begin the installation by clicking the first step.
(See Section 2 of the User Guide for more information)

CONFIGURE THE WIRELESS PRINT SERVER
An easy to use step-by-step utility that guides you through the setup of your WPS870G Wireless Print Server.

INSTALL THE WIRELESS PRINT SERVER DRIVER
This driver should be installed on each PC accessing the print server. The print server should be configured before installing the print server driver.

VISIT THE MOTOROLA BROADBAND WEBSITE

VIEW THE WPS870G USER GUIDE
Read and print documentation about your WPS870G Wireless Print Server.

4 **Wirelessly** connect your Print Server to your router or wireless access point, when prompted.
(See Section 2 of the User Guide for more information)

First: Unplug the Ethernet cable from the router and the Print Server. Then, unplug the power cable from the Print Server.

Second: Plug in the power cable for the Print Server. The Print Server will now wirelessly associate with your router or wireless access point.
